EDUCATION

Gyan Ganga Institute of Technology & Sciences (RGPV)

Jabalpur, India

[cite: 4, 6] Bachelor of Technology in Computer Science and Engineering (CGPA: 7.28/10.0) Expected May 2026 [cite: 5, 6]

- **Relevant Coursework:** Data Structures & Algorithms, Operating Systems, Database Management (MongoDB/Firebase), System Design, Theory of Computation, Cloud Computing (AWS). [cite: 7]

TECHNICAL SKILLS

Languages: Python (Proficient), JavaScript (ES6+), Apex, HTML5, CSS3 [cite: 9]

Frameworks & Tools: React.js, Salesforce LWC, Node.js, Git/GitHub, Salesforce Flow [cite: 10]

Cloud & Databases: Firebase (Auth, Firestore, Hosting), MongoDB, AWS (Amazon Web Services) [cite: 11]

Design: Software Design Diagrams (BPMN, UML, Use Case, Sequence Diagrams), System Architecture [cite: 12]

LEADERSHIP & EXPERIENCE

Software Engineering Intern

Remote

[cite: 32] Completed Internship [Dates] [cite: 33]

- Collaborated with cross-functional teams to build and deploy scalable web solutions, contributing to high-quality code through regular reviews. [cite: 34]
- Assisted in optimizing internal tools and migrating legacy data structures to modern cloud-based environments. [cite: 35]

Fusion Beats Dance Club

Jabalpur, India

[cite: 27] Club Leader [Dates] [cite: 28]

- Spearheaded club operations and managed a diverse team to organize college-wide flash mobs and dance competitions. [cite: 29]
- Directed social media outreach strategies to increase event visibility, resulting in a significant rise in student engagement. [cite: 30]
- Coordinated with college administration and external vendors to secure resources and ensure seamless event execution. [cite: 31]

TECHNICAL PROJECTS

Instagram Innovation Hub | *Firebase, React, Node.js* [cite: 14, 16]

- Developed a centralized collaboration platform utilizing Firebase Authentication for secure user onboarding and role-based access control. [cite: 17]
- Implemented real-time data synchronization using Cloud Firestore, ensuring seamless collaboration and live updates across multiple user sessions. [cite: 18]
- Deployed the application using Firebase Hosting, optimizing global delivery speeds and maintaining high availability during peak traffic. [cite: 19]
- Architected the system using a modular React.js frontend, focusing on low-latency state management and responsive UI/UX across all devices. [cite: 20]

Salesforce Event Hub | *LWC, Apex, Salesforce Flow*

- Engineered an end-to-end event management application utilizing Lightning Web Components (LWC) and Apex for server-side logic. [cite: 23]
- Automated complex event-approval workflows via Salesforce Flow, reducing manual data processing time by approximately 40%. [cite: 24]
- Configured robust Field-Level Security (FLS) and granular sharing rules to ensure data privacy and integrity across diverse user personas. [cite: 25]

ACHIEVEMENTS & INTERESTS

Salesforce Superbadges: Earned professional credentials including Screen Flow Fundamentals and LWC Specialist. [cite: 37]

Technical Interests: Cloud Architecture, Real-time Data Systems, Emerging Web Technologies. [cite: 38]

Personal Interests: Volleyball, Competitive Sports, Canine Behavioral Training. [cite: 39]
